

# Published Articles 2016

Report Produced by

The East & North Hertfordshire NHS Trust Library Team

on behalf of the Research and Development Team

## Purpose

This document provides a list of publications produced by East and North Hertfordshire NHS Trust (ENHT) from January – December 2016.

## Approach

- The Trust library staff search [PubMed](#) (the public version of Medline) and the library's subscription to [BMJ Case Reports](#) on a quarterly basis, on behalf of the R&D team, to find articles published by ENHT staff working on any of the Trust's sites.
- Various permutations of the site names are searched in order to capture as many published articles as possible and these include:

*East and North Herts Trust, East & North Herts NHS Trust; E&N Herts Trust; East and North Hertfordshire NHS Trust; Lister Hospital; Lister Hospital NHS Trust; Mount Vernon; Hertford County Hospital; QEII Hospital; QE2 Hospital; Queen Elizabeth II Hospital; Welwyn Garden City*

This is because a number of staff publish their research without reference to the East and North Hertfordshire NHS Trust using instead Lister Hospital or Mount Vernon Cancer Centre. Whilst every effort is made to capture all published articles, this means that the search presented in this report probably underestimates the actual number of publications.

- The library staff also search, by author, for Trust employees who are known to be engaged in research or who publish regularly.
- A manual sense check is completed to ensure that the authorship of the publications relates to the Trust.
- The references are posted from PubMed into [Citeulike](#), a free web service 'for managing and discovering scholarly references'.
- Articles published in journals that are not indexed on Medline (e.g the Trust's publication - Hertfordshire Journal of Medicine) are added manually to Citeulike.
- Tags are added to each reference to indicate the Trust site where the research has taken place.
- The articles are exported out of Citeulike as a CSV file. They are then formatted into a word document which is proof read and saved both in Word and PDF format.

## Findings

The Trust is research active and for the period Jan 2016 – Dec 2016 produced at least 199 publications which were recorded on Medline. A list of the publications is given in Appendix 1.

Key points are:

- There is a very wide range of research areas including patient care and also patient experience
- Publications are often part of collaborations with a wide variety of organisations
- The research is published in a number of key prestigious journals
- Different staff groups contribute to research publications

Full text of the articles can be provided on request from the library staff by emailing [librarylister.enh-tr@nhs.net](mailto:librarylister.enh-tr@nhs.net). In most cases articles will be sent in electronic format free of charge. Please provide a postal address if a printed copy is required.

Whilst every effort is made to ensure the accuracy of this report, the library team welcomes comments and notifications of amendments. Please contact the team on the above e-mail address.
