

21. My prescription has expired – can my own doctor (GP) renew this for me?

Usually we will provide you with your first prescription for any new disease-modifying treatment commenced but you will need to obtain further prescriptions from your own doctor (GP).

Anti-TNF is only prescribed via the rheumatology department. Your GP will not provide a repeat prescription for anti-TNF. Please request this via your Consultant Rheumatologist secretary. Anti-TNF prescriptions will only be issued on a monthly basis.
