

Eye drops

How to use eye drops

Easy Read Factsheet

Eye drops are medicines that go into the front of your eye and in your eyelids

If you have problems with your eyes your doctor might ask you to use eye drops

It is very important to use your eye drops. Your doctor will tell you when you need to use them

This factsheet explains how to use eye drops.

How to use eye drops

Wash your hands with soap

Shake the bottle of eye drops, then take off the lid

Sit or stand in front of a mirror

Lean your head back

Pull down your bottom eyelid with one finger

Hold the bottle with your other hand

Bring the bottle up in front of your eye

Gently squeeze the bottle, a small drop should fall into your eye. Be careful not to let the bottle touch your eye

Close your eye gently and press softly on the inside corner of your eye for 1 minute

If you use different types of eye drop medicine, wait 5 minutes before putting in a different eye drop

It might take some time learn how to use the eye drops.
Keep practising with your eye drops.
Each time will get easier

If you find it difficult putting your eye drops in you could use an eye drop dispenser

You can try different types of eye drop dispenser

Remember to wash your hands after using your eye drops
