

Published Articles 2019

Report Produced by

The East & North Hertfordshire NHS Trust Library Team

on behalf of the Research and Development Department

Purpose

This document provides a list of publications produced by East and North Hertfordshire NHS Trust (ENHT) from January – December 2019.

Approach

- The Trust library staff searched [HDAS](#) Medline and [PubMed](#) (the public version of Medline) on behalf of the R&D team, to find articles published by ENHT staff working on any of the Trust's sites.
- Various permutations of the site names were searched in order to capture as many published articles as possible and the results were exported into an Excel file.
- Staff publish their research frequently without reference to the East and North Hertfordshire NHS Trust using instead Lister Hospital or Mount Vernon Cancer Centre etc. Whilst every effort is made to capture all published articles, the search presented in this report may underestimate the actual number of publications. The search history is attached as an appendix.
- A manual sense check is completed to ensure that the authorship of the publications relates to the Trust.
- The references are formatted into a table in a word document to indicate where the authors are located and where publications have been co-authored with the University of Hertfordshire.

Findings

The Trust is research active and for the period Jan 2019 – Dec 2019 the library found 184 references published by East and North Hertfordshire NHS Trust staff which were recorded on Medline, of which 24 were published jointly with the University of Hertfordshire and 46 were letters, comments, errata or reviews.

Key points are:

- There are a very wide range of research areas
- Publications are often part of collaborations with a wide variety of organisations
- The research is published in a number of key prestigious journals
- Different staff groups contribute to research publications
- Letters, comments, errata and reviews have been recorded this year and are colour coded on the table.

Full text of the articles can be provided on request from the library staff by emailing librarylister.enh-tr@nhs.net. In most cases articles will be sent in electronic format free of charge. Please provide a postal address if a printed copy is required.

Whilst every effort is made to ensure the accuracy of this report, the library team welcomes comments and notifications of amendments. Please contact the team at the above e-mail address.
