

Anima The sand trap south of The Lawn catches

Roe deer 40mm

Blackbird Grey squirrel

Dog various sizes

Muntjac 30mm

wildlife footprints. Use this guide to

Uplifting green space

Time outside to sit, walk and enjoy the guiet among wildlife is a proven way to de-stress. A stroll among trees or a shared cuppa in our green grounds offers a mental rest and a natural boost to mood.

Our top 10 trees

Find your favourites using our map (see over)

Italian **Alder**

Alnus cordata

Thrives on drier soils than other alders. Has both male (slender) and female (ovoid) catkins.

Weeping Birch

Betula pendula

Our native 'tree of beginnings' is the first to colonise after fire or ice. Place names like Berkhamstead relate to birch. Look out for its purple haze of branches in winter.

Scots Pine

Pinus svlvestris

Found across the Baltic region. Red-orange bark. Known as 'keeper of the forest' as it is a magnet for wildlife.

Californian Lilac

Ceanothus sp. A firm favourite with honeybees for its magnificent purple-blue blooms. Also known as 'soap bush'.

Rowan or **Mountain Ash**

Sorbus sp. Planted for protection at

entranceways. Has perfectly symmetrical leaves.

Taxus baccata

Every part is poisonous yet it is symbol of immortality. An extract of the needles is used in cancer treatment.

Almond

Prunus dulcis Self-fertile, this sole survivor of three planted here will crop on its own. Pink blossom in spring.

Oak

Quercus robur

One of a line planted 100 years ago along an old bridleway. A single old oak supports over 3,000 species.

Pendula

Fraxinus excelsior Full of character (and nesting birds). Ash 'key' seeds in winter.

Silver Wattle

Acacia dealbata Native to Australia. Known as 'mimosa'. the flower essence is used to make perfume

sculpture. Help it grow by purchasing a hand-crafted leaf or blossom to remember someone special or honour an occasion. All proceeds support people affected by cancer.

or Weeping Ash

All are welcome in the

Fern Garden

Nestled behind the Chemo Suite and Chart

Lodge is this hidden gem. Follow the yellow signs to this peaceful place. There is plenty

of seating and an all-weather shelter of

larch (with wifi and power sockets).

Also find a hawthorn dedication

Visitors can ask for a pager in Chart Lodge or Chemo Suite to take to the Fern Garden.

The Lawn

A must-see at Mt Vernon, the lawn has a wealth of nature to explore. Simply sit near the door and breathe, find solitude by the pond at the bottom of the magical woodland walk or see what animals have visited the sand trap.

Outdoor seating

Meet or eat outside for a welcome change of perspective.

Moon canopy

Look out for activities offered under the Moon Canopy - see the Wellbeing board in the green-tiled corridor, Main Building.

Football pitch

For some colleagues, chasing a ball around is the best way to wellbeing.

Wildflower meadow

Carefully nurtured using a cut and collect regime and sown with British native species, this is a treat for the senses.

Sand trap for footprints

our visitors from tracks they leave in the sand.

Use our guide on the back page to identify

Pond Our small wild pond attracts an amazing range of wildlife from damselflies to muntjac deer.

Crow 60mm Pheasant 70mm
