Purpose

This document provides a list of publications produced by East and North Hertfordshire NHS Trust (ENH) staff from January 2023 – December 2023.

Approach

The ENH Trust Knowledge and Library Services (KLS) staff conducted searches on MEDLINE, EMBASE, PubMed, CINAHL and EMCARE databases on behalf of the Research and Development team, to find articles published by ENH staff working at any of the Trust's hospital sites.

Various permutations of ENH site names were searched in order to capture as many published articles as possible. (See appendix A) The results were exported into Refworks and checked for deduplication and on an Excel spreadsheet for sorting and further checking. A manual check was done to ensure that the institutional affiliations of the authors relate to the ENH and the URLs / DOIs are included for verification.

The search found many publications that did not reference ENH as the institution, using instead only the site names 'Lister Hospital' (LIS) or 'Mount Vernon Cancer Centre' (MVCC) or 'Hertford County Hospital' (HCH) etc. In some cases, the site name was not specified. Whilst every effort has been made to capture all published articles, the results presented in this report may underestimate the actual number of publications. The terms used to conduct the search are included in Appendix A.

The references are formatted into a table below to indicate where the authors are located and where publications have been co-authored with the University of Hertfordshire (UH).

Findings

For the period January 2023 – December 2023, the search found 387 references published by East and North Hertfordshire NHS Trust staff of which 27 were jointly published with the University of Hertfordshire. The results include 28 systematic review/meta-analysis and 7 randomised controlled trials.

Key points are:

- The publications cover a wide range of research areas
- Publications are often part of collaborations with a wide variety of organisations
- Research is published in a number of high impact journals
- Different staff groups contribute to research publications
- Publication type is included for most articles, where we have been able to extract this from the database

Some of the articles can be downloaded by opening the URL/DOI links provided using your NHS Open Athens details to login to the publishers site. Articles that are not directly accessible from the links can be provided upon request from the KLS using our document supply [request form](#) or by emailing librarylister.enh-tr@nhs.net. In most cases, articles will be sent in electronic format, free of charge. Whilst every effort is made to ensure the accuracy of this report, the Knowledge and Library Services team cannot guarantee that all publications have been found. We welcome comments and notifications of amendments. Please contact the KLS team at the above e-mail address.
