

REPORT ON STAFF RESEARCH PUBLISHED ARTICLES YEAR 2022

This report is produced by the East and North Hertfordshire NHS Trust Knowledge and Library Services on behalf of the Research and Development Department.

e-mail: librarylister.enh-tr@nhs.net

website: <https://oaks.libguides.com/lister>

Tel: 01438 285520

Date: March, 2023

Purpose

This document provides a list of publications produced by East and North Hertfordshire NHS Trust (ENHT) staff from January 2022 – December 2022.

Approach

The ENHT Trust Knowledge and Library Services (KLS) staff conducted searches on EMBASE, MEDLINE, PubMed, CINAHL and EMCARE Databases on behalf of the Research and Development team, to find articles published by ENHT staff working at any of the Trust's hospital sites.

Various permutations of ENHT site names were searched in order to capture as many published articles as possible. (See appendix A) The results were exported into Refworks for deduplication and on an Excel spreadsheet for sorting and further checking. Search terms such as 'Mount Vernon', 'Lister Hospital' and 'QE II Hospital', are complicated and it is not always clear that the authors are employed by ENHT as the names are used in other parts of the UK or in other countries such as the USA and Australia. A manual check was done to ensure that the institutional affiliations of the authors relate to the ENHT and the URLs / DOIs are included for verification.

The search found many publications that did not reference ENHT as the institution, using instead only the site names 'Lister Hospital' (LIS) or Mount Vernon Cancer Centre (MVCC) etc. In some cases, the site name is not specified. Whilst every effort has been made to capture all published articles, the results presented in this report may underestimate the actual number of publications. The terms used to conduct the search are included in Appendix A.

The references are formatted into a table below to indicate where the authors are located and where publications have been co-authored with the University of Hertfordshire (UH).

Findings

For the period Jan 2022 – Dec 2022, the search found 301 references published by East and North Hertfordshire NHS Trust staff of which 37 were jointly published with the University of Hertfordshire and includes 20 systematic review/meta-analysis and 7 randomised controlled trials.

Key points are:

- The publications cover a wide range of research areas
- Publications are often part of collaborations with a wide variety of organisations
- Research is published in a number of high impact journals
- Different staff groups contribute to research publications
- Publication type is included for most articles, where we have been able to extract this from the database

Some of the articles can be downloaded by clicking on the URL links provided and logging in using your NHS Open Athens credentials. Articles that are not directly accessible from the links can be provided upon request from the KLS by emailing librarylister.enh-tr@nhs.net. In most cases, articles will be sent in electronic format, free of charge. Whilst every effort is made to ensure the accuracy of this report, the Knowledge and Library Services team cannot

guarantee that all publications have been found. We welcome comments and notifications of amendments. Please contact the KLS team at the above e-mail address.

An overview of search findings
